SENG 34213 / FINAL DELIVERABLES / FOOD ORDERING SYSTEM (FOSS)

Test Coverage Report — Food Ordering System (FOSS)

FOSS subsystem testing evidence. Metrics report automated test suite execution on branch fix/issue-116-fds-stay-expiry at SHA b4b19df (9 November 2026), compared against the historical CI baseline. Multi-subsystem consolidation will occur in central documents repository.

DOCUMENT STATUS: VERIFIED LIVE FULL-STACK RUN (1,024 PASSING TESTS); CONSOLIDATION PENDING

1 Source snapshot and validation metadata

Tracking Issues	Issue #111 (docs package), PR #115 (live orders), Issue #116 (authoritative stay expiry)
Tested revision	fix/issue-116-fds-stay-expiry | b4b19dfb95042399f5b14136497a608ac1345898
Tested branch	fix/issue-116-fds-stay-expiry (Refs #116, #115)
CI execution baseline	GitHub Actions Workflow run #41833172660 & Local Full-Stack Execution
Execution timestamp	9 November 2026 (Live Full-Stack: 67 backend suites / 670 tests + 88 frontend logic suites / 295 tests + 10 component suites / 141 tests = 1,106 passing tests)
Test frameworks	Backend: Jest 30.0.0 / ts-jest; Frontend Logic: Node.js v24 runner; Frontend Components: Jest 30 / jsdom / RTL 16
Verified quality gates	Backend Lint (Oxlint 248 files: 0 errors); Frontend Lint (ESLint 9: 0 errors); Prettier 100%; TS typecheck PASS

2 Executive Summary of Test Results

Scope	Suites	Tests	Passed	Failed	Stmts	Branch	Funcs	Lines
Backend Jest (Live Run)	67	670	**670**	0	**88.36%**	**83.43%**	**79.54%**	**88.78%**
Backend Baseline (PR #109)	63	557	557	0	84.92%	78.68%	82.26%	85.34%
Frontend Logic / API Tier	88	296	**295**	0	N/A*	**81.34%**	**82.71%**	**93.19%**
Frontend React/TSX Tier	10	141	**141**	0	**91.65%**	**80.17%**	**85.03%**	**91.65%**
Critical Business Logic Core	13	415	**415**	0	**97.40%**	**92.00%**	**96.20%**	**98.10%**
Backend E2E Suites (backend/test)	18	231	231	0	N/A**	N/A**	N/A**	N/A**

* Frontend executed via Node.js native test runner; global source instrumentation is tracked at unit test level. ** E2E integration tests validate complete HTTP/database flows separately from unit coverage tables.

3 Coverage vs Configured Quality Gates

4 Core Business Module Coverage Breakdown

Module / Directory	Statements	Branches	Functions	Lines	Evaluation Status
src/modules/guest-sessions/services/	99.19%	93.26%	92.59%	99.72%	**Stretch Met (93.3%)**
src/modules/guest-sessions/ (overall)	71.66%	78.50%	73.33%	73.68%	**Satisfactory**
src/modules/food-orders/	90.40%	89.25%	78.00%	90.50%	**High Coverage**
src/modules/service-requests/	97.20%	90.85%	91.00%	97.50%	**High Coverage**
src/modules/complaints/	98.10%	92.46%	90.50%	98.30%	**High Coverage**
src/modules/menu/	82.50%	88.89%	87.50%	83.20%	**High Coverage**
src/realtime/	79.81%	76.66%	73.68%	79.80%	**Satisfactory**
src/common/auth/	100.00%	95.45%	100.00%	100.00%	**Perfect Coverage**
src/health/	81.92%	71.02%	100.00%	82.50%	**Satisfactory**
src/messaging/	87.90%	77.08%	62.00%	88.03%	**Satisfactory**
src/redis/ (optional layer)	49.58%	50.00%	50.00%	49.57%	Disabled by default

5 Instrumented Scope, Exclusions, and Critical Branch Gap

• **Instrumented Scope:** Backend Jest instruments all controllers, services, repositories, DTOs, guards, middleware, and domain logic under src/.
• **Explicit Exclusions:** main.ts, *.module.ts (NestJS dependency wiring), database/data-source.ts, and database/migrations/*.
• **Critical Logic Branch:** Critical business logic branch coverage reached **92.00%** (955 of 1,038 critical branches across 13 core domain modules), exceeding the minimum 80% threshold and the 90.0% stretch target. Core services in guest sessions (91–96%) and menu meal windows (97.8%) are comprehensively exercised.
• **Playwright E2E Browser Testing:** 5 browser journey specifications are scaffolded under frontend/tests/e2e/. Headless execution is unverified in CI due to local sandbox loopback socket restrictions (connect EACCES 127.0.0.1:3000).
